FIRST FOR SERVICE EVERY TIME

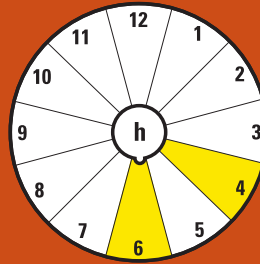

We consistently win awards for our outstanding service levels. Your assurance that, with WF, we won't let you down

This professional range of industrial plugs and sockets utilise screwless terminal connections and can be used in a wide variety of commercial and industrial applications which provide the following time and cost saving benefits:

- Maintenance free terminals.
- Shock and vibration resistant allowing minimal down time.
- Four point twist lock.
- Self cleaning contacts.
- Chemical resistant and corrosion free terminals.
- Re-usable.
- Screwless terminal connections.
- Quick to install.
- Automatic cable clamp.
- Complies to EN 60309/2 and BS 4343 and rated IP44.

Ideal for use on building sites, dockyards and food production industries.

In order to prevent products with different voltages from being connected to each other, the earth socket tube is placed in a different 'clock' position according to voltage and frequency. This clock position is determined by looking at the socket outlet from the front, with the key way at the bottom. Unless otherwise stated all frequencies are 50-60Hz.

QUALITY - PERFORMANCE - VALUE

Every product in the Alto range is performance tested to meet the relevant performance criteria and represents outstanding value for money.

- By referring to the 'clock position' of the earth socket tube, interchangeability of products of a different voltage is prevented. This clock position is determined by looking into a socket outlet from the front, with the key way at the bottom.
- Unless otherwise stated all frequencies are 50-60Hz.
- A range of Industrial Plugs, Connectors and Socket Outlets that comply with EN 60309/2 and BS 4343. Rated IP44.
- All Alto industrial Plugs and Sockets are colour coded to provide straight forward identification of the different voltages.
